

Visiting Kazakh National museum

Students and teachers of our department take part not only in scientific conferences, but also in cultural events. On November 11, students of the department "Technological machines and equipment" and the curator of the first course Nazihanov M. Abdulaziz visited the Kazakh National Museum. Students learned a lot of valuable information about the country, about the history and traditions of our nation. Below are the photos of students and the head of the cultural circle
