

In honor of the 130th anniversary of S.Seifullin's birth on 03/01/2024, topical issues related to modern information systems in territory management were raised at a round table within the framework of the forum «Innovative Technologies in Geodesy, Land Management and Cadastre», held at the Faculty of Land Management, Architecture and Design:

1. "Recarbonization in Kazakhstan" - Doctor of Economics, Professor G.K. Kurmanova;
2. "Digitalization of documents in land cadastre institutions" - Head of the Department of Land Cadastre and Registration in the Esil district of Astana A.T. Iskazin.
